### **DETAILED ACTION**

Claims 1-12, 17, 21-26, 33, 36 and 59 are pending in the application.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 17, 21-26 and 59, drawn to an isolated nucleic acid segment encoding a polypeptide comprising the sequence of SEQ ID NO:2, a polypeptide comprising the sequence of SEQ ID NO:2, a host cell comprising said nucleic acid.

Group II, claim(s) 33, drawn to a method of identifying a subject at risk or suffering from degenerative disease by obtaining a bone tissue and assessing expression of HA4 in said sample, wherein a reduced amount of HA4 expression indicates increased risk or suffering from a bone degenerative disease.

Group III, claim 36, drawn to a method of treating bone disease in a subject comprising increasing the level or activity of HA4 in bone tissue of said subject.

The inventions listed as Groups I-III do not relate to a single general inventive concept because they lack the same or corresponding special technical feature. The special technical feature of Group I is a polypeptide having the sequence of SEQ ID NO: 2, which differs from the rest of the groups. The special technical feature of Group II is expression of HA4 and its relationship to risk and suffering from bone degenerative disease, which is not shared by the rest of the groups. The special technical feature of Group III is the expression and activity of HA4, and its relationship to treating bone degenerative disorder, which is not shared by the rest of the groups. Therefore, the unity of invention does not exist between the claims of Groups I-VI.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
